Russ and his fellow workers are amazing; they were extraordinarily easy to work with (we had some special circumstances for payment, and Russ took that in complete stride, without blinking), they did a wonderful job very quickly, they charged a very reasonable price for everything (and explained every step of the process), and Russ even came to correct some issues that were caused by another contractor--gratis! I can't recommend them strongly enough; wonderful, wonderful people!

Russ did a very thorough and professional job installing our systems. He was quick yet took the time to answer my questions as I was looking over his shoulder in fascination of how this system works. My wife was concerned about what the system would look like outside of our house and Russ found a perfect spot to conceal the pipe well. When he was done, his final product was perfect, well documented and there wasn't a spec of dirt anywhere to show that he had just drilled through our basement floor. He made sure to describe all of the paperwork that he left with us and how I could periodically check the system. Great job, Russ.

Project: Mitigate Radon Gas

Russ Davidoski did an excellent job all around. He explained the radon mitigation process, gave great suggestions about the location of the system, installed it efficiently and left no mess behind. After comparing four companies, Russ had the best system for the right price. I would definitely recommend him to anyone with a radon issue.

Project: Mitigate Radon Gas

Russ was great to work with. I waffled on the project for a while, but when I was ready to go, he scheduled an appointment promptly. I had them route the vent out our attic and it looks great. Before the system was installed, we averaged around 3pCi/L with spikes as high as 18pCi/L. After the system was installed, the highest I've seen is 0.25pCi/L. Very happy.

I would HIGHLY recommend Radon R Us. Russ was great, very professional, excellent quality work, dropped our radon levels to below 1. In addition, Russ is a good guy, focused on doing a great job and making sure the customer is satisfied. Initially, I thought he would install a clear sump cover/lid, so I asked after he finished the job. I misunderstood the pictures he sent so was my fault....but despite that, Russ returned and replaced my lid with a clear top, and refused to accept payment. I would highly recommend!

Russ is a real professional, he does a great job, is very honest, courteous, kind, prompt, thoughtful and takes great pride in his work. His prices are more than fair, I don't think you could find this expertise for less and his knowledge and the work he does is the best. I would recommend him to anyone. My radon level went from 12.9 to less than 1 (0.9) when I retested, You just cannot go wrong hiring Russ to do your radon mitigation. A++.

My job requires me to work with all different contractors of the home improvement industry, I have seen the good, the bad and the ugly. Russ belongs in the very rarely assigned EXCELLENT category. He was kind, clean and professional. His timing was prompt, his pricing more than fair & his knowledge exceeded that of a memorized pamphlet. He went above and beyond and temporarily worked in an unlit area until we could locate a light bulb an hour later. He values his small business and is one of the few companies left that puts more weight on quality over quantity. Should you find yourself in the conundrum of radon in your home, look no further you have found your contractor.

We have a older home and the radon level was at 5.1. Radon R Us installed the radon system and the levels came back at 4. We called to get this resolved since the level was still above the EPA guidelines and he came out first chance to resolve the issue. He had to install a bigger fan and ran a 2nd system at no extra charge. Very pleased. I have read nightmare reviews about other companies. My levels are know under 2

"I was very pleased with the radon mitigation work that Russ Davidoski of Radonrus performed for me. He was very knowledgeable about the process and took the time to explain why he was doing certain things. I chose him over a larger operation because he was more reasonably priced and didn't try to high pressure me into making a quick decision based on a "Today Only" price quote. But what really impressed me was the extra work that he did to make sure the job was done right. I asked if he could paint the exterior tubing to match my home. I gave him the paint specification code and manufacturer and he bought the exact same paint to pre-paint the tubes prior to installation. He charged me a reasonable fee for this service but it was better than trying to paint it after it was installed. Additionally, because the process requires that the sump pump well be sealed, he took the time to run all my various drain tubes (hot water heater, dehumidifier, and water softener) into the well and seal them. He even went so far as to extent one of my pipes so it would have better access to the well. All this at no extra charge. As soon as he finished my house he drove over to my son's home to put a mitigation system in for him. He was able to do both homes the same day. Both installations look great and Russ cleaned up after himself so there was no mess left behind. Most importantly the radon mitigation system works. Both homes now have a reading below 1.0, a significant drop from their previous levels. I would recommend Randonrus without hesitation to anyone interested in a radon mitigation system."

Radon R Us really does a great job. I was impressed from the first email. He sent photos of comparable jobs to let me know what would be installed, sent a copy of his insurance, and a quote! The mitigation unit he installed was well done and he made sure to put it in a spot that was the least visible from the road and I appreciated that. Our radon levels have dropped from 8 to 1.2 (and still dropping). Thanks, Russ!

Russ was the consummate professional. He was extremely friendly, courteous, and punctual. Despite it being a rainy day with a constant heavy downpour, and my house not having sod yet--creating a very muddy scene, he did not get any dirt or leave any messes anywhere. He also went above and beyond by making sure my sump pump is easily accessible. His craftsmanship is impeccable and flawless. I called around and researched prices and ratings, and found Russ to be consistently rated the highest. I found all of the ratings to be true and absolutely recommend Russ enthusiastically and would definitely use him again.

Russ was a one person show, and did a very nice and effective installation. Sump was sealed and the rest of the unit was installed nicely along the side of the house that isn't normally seen. Very effective. Readings are now averaging 0.5. Great job and price And easy person to work with. Would definitely recommend. Couldn't be happier. Radon readings were averaging 5-6. Russ replaced an old, dying fan in my radon mitigation system. He also came out a second time at no charge after a piece of debris got into the fan and caused a vibration. Russ took the time to talk to me about the system I have in place and help me understand how it all works. He's professional, and a straight-shooter. Replaced worn fan perfectly! Radon R Us was recommended to us by our realtor when we discovered excessively high levels of radon in our home several years ago - I was in awe at the time of the installation of the mitigation system by how well everything went - Russ is a very likeable, knowledgeable, efficient craftsman - explaining everything to us, cheerfully answering any questions. He completed the installation quickly, even going out of his way to seal up our sump-pump broken cover and make a special seal for a floor drain - and yes! the radon levels plummeted to safe levels! Yesterday the fan went out, we had no hopes of having it repaired until after the weekend but when we called Russ he graciously came out on a Saturday - quickly diagnosed the problem - quickly replaced the fan - and we are once again radon-free! I'm still beyond impressed by Russ' friendliness, expertise and professionalism. If you have a radon problem in your home (and in mid-Michigan, you're pretty much guaranteed to have a problem) I enthusiastically recommend Radon R Us. 08/25/2017

The entire process, from start to finish, went as expected. The installation was explained in great detail and we were provided with a follow-up radon kit to re-test the radon levels. We were pleased to see that the post radon levels were well below the requirements. 06/18/2017
